Hello, my name is Marianna Gonchar

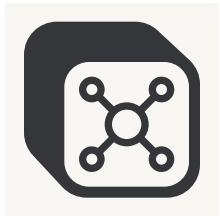

I'm an Ukrainian **Senior UX Designer**, committed to **building products, services and businesses** that make a meaningful positive impact in the world. I have **10+ years of experience** in the digital industry, working in startup, agency and corporate environments.

I'm currently working at **Awesomic** as a part-time but looking for deeper Product-related experience with ability to develop and dive deep into one product.
Before 1.01.2026 was redesigning and rolling out the Investment Platform Semaverse.ai, as a solo-Product Designer

MY SUPERPOWERS

1. **Prototyping and Wireframing:** I create prototypes, wireframes, and user flows at different stages of product development;
2. **UI Design:** I design visually appealing user interfaces that are intuitive to navigate and use with minimal friction for target users;
3. **UX Writing:** I can write clear and concise copy that supports the overall user experience;
4. **User Research:** I can conduct research to understand user needs, motivations, expectations, and pain points;
5. **Visual Design:** I am great in designing visual elements to create a cohesive and aesthetically pleasing product;
6. **Information Architecture:** I am organizing and structuring content and information in a way that is easy to understand and navigate for users;
7. **User Empathy:** I can identify the needs and feelings of users to design products that meet their needs and expectations;
8. **Usability Testing:** I conduct testing product designs with users to identify usability issues and opportunities for improvement;
9. **Coding Knowledge:** I have a basic understanding of coding languages and can develop on no-code such as webflow;
10. **Active Listening:** I am listening actively to user feedback, understanding their needs and concerns, and incorporating their feedback into the design process;
11. **Critical Thinking:** I am analyzing information and feedback to identify problems and develop solutions;
12. **Business Acumen:** I deeply understand how businesses work and how a product can deliver value to both the user and the company;
13. **Cross-Team Collaboration:** I am working effectively with developers, project managers, and other stakeholders to create a successful product
14. **Customer Service:** Understanding the importance of service. I see my products as a user's servants, and think from that point of view.

WORK EXPERIENCE

Product Designer in Semaverse

[Semaverse.ai](#) · Full-time

Sep 2023 - Jan 2026
London, UK - Remote

Semaverse.ai is an AI-driven platform focused on working with complex, high-value investment data and documents, where correctness, clarity, and trust are critical. In this role, I was responsible for end-to-end product design with a strong focus on complex workflows, AI interaction, and document-heavy systems.

Key contributions:

- Fully redesigned and significantly improved document workflows, including uploading, saving, versioning, and managing complex investment documents.
- Designed clear and predictable user flows for working with highly structured financial and investment data, reducing ambiguity and user errors.
- Worked extensively on AI-interaction agents, defining how users interact with AI to analyze, interpret, and navigate documents and data.
- Established explicit system states for document handling (view / edit / processing / saved), ensuring transparency and auditability.
- Designed and validated interaction patterns for data-heavy interfaces, tables, and forms used in investment-related workflows.
- Conducted multiple types of user research and usability testing to validate flows, reduce friction, and improve comprehension in complex scenarios.
- Collaborated closely with engineers to ensure designs were technically feasible, predictable, and resistant to edge-case failures.
- Contributed to system-level consistency by defining reusable interaction rules and patterns across the platform.

Impact:

- Improved reliability and usability of document-related workflows.
- Reduced user confusion around AI-driven actions and system states.
- Made complex investment operations more understandable, traceable, and safe for end users.

UX-Design and Mobile interface courses Curator

[Projector Institute](#) · Part-time

May 2023 - Present
Kyiv, Ukraine

As a curator for students, my role is to provide guidance and support throughout their learning journey. I teach them best practices and industry-standard techniques to excel in their chosen field. I help students understand complex concepts, identify areas for improvement, and develop their skills through practical projects and hands-on experience.

In addition to delivering instructional content, I actively engage with students, offering personalized feedback and constructive criticism to help them grow as professionals. I create a conducive learning environment that fosters creativity, critical thinking, and collaboration among students.

As a mentor, I am dedicated to nurturing their talents and inspiring them to explore new ideas and possibilities. I encourage students to ask questions, seek solutions independently, and embrace continuous learning to stay up-to-date with the ever-evolving industry trends.

Furthermore, I provide resources and references, enabling students to explore real-world examples and industry case studies to enrich their learning experience. My ultimate goal is to empower students to build a strong foundation in their field, instill a passion for excellence, and prepare them for successful careers in their chosen profession.

Product Designer

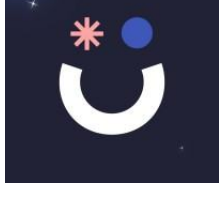

[Lumio](#) · Full-time

Jan 2022 - Present
London, UK - Remote

As a product designer for Lumio Savings app, my work involves diving into the depths of research and understanding the constraints of different approaches. I enjoy spending hours analyzing data and user feedback, identifying pain points and opportunities for improvement. My focus is always on delivering the best user experience possible, which means collaborating with developers to ensure that every pixel is perfect. My design system is my trusted companion, and I spend a lot of time tweaking it to make sure that everything looks and feels consistent. Whether I'm working on wireframes, prototypes, or final designs, I work closely with the rest of the team and I love that we have such a perfect opportunity to help families of all sized to improve their financial health.

As I am solo-designer, I perform also tasks related to graphic design and webflow.

- UX design for web, iOS and Android applications using Agile methodology
- Market analysis
- User research
- Scenarios, use cases and personas
- High and low fidelity wireframes
- Flow diagrams
- High and low fidelity prototyping
- Live user testing
- Design culture evangelism

Senior UI/UX Designer

[Awesomic](#) · Full-time

Sep 2021 - Present
Kyiv, Kyiv City, Ukraine

Before launching 1-1 with the British startup Lumio, I was actively performing tons of tasks for creative websites for different companies such as: Crypto, NFT, Fintech, USA medical and veterinary services, cybersecurity, entertainment and beauty branches, as well as business and marketing clients. And of course I am proud of creating beautiful and user-oriented complex apps - one of them was a logistics app Welltrax and entertainment Crypto-TikTok mix app Coinflix. I just adore my Awesomic team, these people definitely have superpowers and I am extremely happy to be in this pack.

- UX design for web, iOS and Android applications using Agile methodology
- Market analysis
- User research
- Scenarios, use cases and personas
- High and low fidelity wireframes
- Flow diagrams
- High and low fidelity prototyping
- Live user testing
- Design community building
